

Chokchai Faroongsarng

Bangkok, Thailand | 094 - 559 - 0676 | chokchai.fa@outlook.com

Software Engineer with over 3 years of experience in financial and insurance domains. Skilled in communication, time management, and rapid project execution. Provides valuable consultation to optimize processes, improve solutions, and enhance team performance. Maintains a positive attitude and is always open to feedback to address and resolve issues.

EDUCATION

Chulalongkorn University

Master of Science in Computer Science (*GPA 4.00*)

Department of Computer Engineering

Bangkok, Thailand

Jul 2023 - Present

King Mongkut's University of Technology Thonburi

Bachelor of Engineering (*GPAX 3.59*)

Department of Electronic and Telecommunication Engineering

Bangkok, Thailand

Aug 2018 - May 2022

WORK EXPERIENCE

Muang Thai Life Assurance Pcl.

Senior Software Engineer

Bangkok, Thailand

Jul 2023 - Present

- Collaborated with the Product Owner and Business Analyst to design technical solutions for group insurance core system, including software architecture, database design and cloud infrastructure, to meet business needs.
- Owned the development of the core policy module, the most critical component of the insurance system.
- Developed a core group insurance system serving a large user base by leveraging Microservices Architecture, enhancing scalability and performance.
- Implemented robust CI/CD pipelines and deployed applications on Kubernetes, utilizing Infrastructure as Code principles with IaC tools.
- Worked closely with the Quality Assurance team to support agile testing processes and promptly resolved any defects that emerged during the development cycle.

Siam Commercial Bank Pcl.

Software Engineer

Bangkok, Thailand

Jun 2022 - Jun 2023

- Developed mobile banking applications (MaeManee and CBDC) and microservices emphasizing user experience, API services, and security, capable of supporting millions of users.
- Developed a CI/CD pipeline to automate the build and release process of mobile applications (Mae Manee, CBDC and WPlan).
- Initiated innovative solutions to address evolving customer needs in the mobile banking industry.
- Successfully coordinated multiple foreign project managers and tech leads simultaneously to develop tools used across 4 projects within a three-month timeframe.

Toyota Tsusho Denso Electronics (Thailand) Co., Ltd.

Intern Software Engineer

Bangkok, Thailand

Jun 2021 - Nov 2021

- Investigated and applied Rapid Control Prototype technology in the ECU software development process, leading to significant reductions in cost and development time.
- Designed and developed a simulation engine model for testing software, reducing reliance on real hardware and streamlining the software development process.
- Worked in a diverse environment with engine managers reporting to Japanese General Managers

TECHNICAL SKILL

- **Programming Language:** Go, Python, SQL, Javascript, Typescript, Java
- **Framework:** Gin, Fiber, Echo, Django, Fast API, React, React Native, Express JS, Spring Boot
- **Database:** RDMS, Dynamo DB, Mongo DB
- **Container Technology:** Docker, Kubernetes
- **Continuous Integration & Continuous Delivery:** Jenkins, GitLab CI, Flux-CD, Fastlane, Firebase Distribution
- **Message Queue Technology:** Sqs, Kafka, RabbitMQ
- **Infrastructure as Code:** Terraform, CrossPlane
- **Cloud Service:** Amazon Web Service, Google Cloud Platform

KEY COMPETENCIES

Communication
Multitasking
Problem solving skills
Fast learning

System design
Collaboration
Flexibility
Time management

Creativity
Database Management
Adaptability
Critical Thinking

LANGUAGE

- **Thai** : Native
- **English** : Proficient

CERTIFICATION

- Exam Prep Standard Course : AWS Certified Solution Architect - Associate (SAA-C03) from Amazon Web Services
- Complete Web Development from Udemy

ACTIVITIES

- Worked as a Teaching Assistant at King Mongkut's University for one semester, collaborating closely with Cambodian and African staffs to design assignments and review student homework.
- Joined as the leader of the Computer Programming tutor team for all freshmen in the Electronic and Telecommunication Department, designing and teaching the course at the TUE ENE KMUTT Camp.
- Became the head of the Digital Circuit and Logic Design tutor team at E-CAMP, where we taught and designed the course for students interested in electronics.
- Participated in the Robo Innovator Challenge 2020 organized by Software Park Thailand, where I competed in designing and developing a self-driving car for logistics applications.
- Participated in the DevDisrupt Hackathon Thailand 2020, focusing on designing and developing an application centered around education.
- Participated in a camp to renovate spaces for the Dareeseen community in Pracha Uthi, Bangkok.

AWARDS

- Achieved 4th prize in the National Software Contest 2017 in the Application Program category
- Achieved 3rd prize in the AI Race at Bangkok Maker Faire 2020 for a mini self-driving racing car
